Technology In Society

Subject/Title Index to Volume 15, 1993

Addendum: Financing R&D Systems in OECD Countries and Czechoslovakia — A Comparison, 53
Addendum: New Methods of Financing Science in Poland, 71
Agricultural Research and Development in Eastern European Countries: Challenges and Needs, 111
An Engineer's Review of Antonio Meucci's Pioneer Work in the Invention of the Telephone, 409

Biotechnology financing in developing countries, Brazilian case in point, 311
Brazil, biotechnology funding in, 311
Bulgaria, science and technology in, 57

Challenger: The Anatomy of a Flawed Decision, 161
China; science, technology, and society studies in, 243
Communication about greenhouse effect and energy policy in Germany, 301
Communication and information technology, techno-political view on development of, 327
Cooperation with Eastern European Countries in Science and Research: A New Initiative of the European Community, 149
Czechoslovakia
  comparison of R&D systems financing in OECD countries and, 53
  medical sciences in, 131
  OECD science and technology policy reviews in Hungary and, 155
  research and education in, 41

Decision making
  flawed decisions leading to Challenger disaster, 161
  role of technical expertise in forestry management policy implementation in Spain, 383
Decision making, political, in science and technology, 371
Defense systems, Gulf War's impact on ballistic missile, 253
Demonstrations: The Missing Link in Government-Sponsored Energy Technology Deployment, 185
Developing countries' biotechnology financing, Brazilian case in point, 311
Digital Equipment Corporation in Hungary, 159

Economics, Technology, and Environment in Hungary, 137
Economy; technology and science developments responding in Hungary, Turkey, and Yugoslavia to adjustments of, 281
Education and research in Czechoslovakia, 41
Education; science, technology, and society studies in China, 243
Education, engineering
  function of nontechnical studies in German engineering education, TIS10
  historical overview of nontechnical subjects in German engineering curriculum, 441
  recommendation of VDI on integration of transdisciplinary studies into engineering curriculum, 461
Education, higher, and restoration of academic work in Romania, 75
Electronic data interchange, techno-political view on development of, 327
Energy policy, study of communication in Germany about greenhouse effect and, 301
Energy technology deployment, demonstrations as missing link in government sponsorship of, 185
Environment, technology, and economics in Hungary, 137
Ethics, engineering; historical and philosophical development in Germany of, 427
Europe, Eastern
  challenges and needs of agricultural R&D in, 111
  cooperation initiative with European community in science and research, 149
  re-emergence of science and technology in, 3
  reversing the brain drain in, 101
Europe, Western; government policy shift from industry to technology targeting in, TIS1

Facing the Greenhouse Effect: Communication about Energy in Germany, 301
Factor substitution of productivity growth for identifying technological change, 229
Financing of Biotechnology in Developing Countries: A Brazilian Case in Point, 311
Financing methods for science in Poland, 71
Financing R&D systems in OECD countries and Czechoslovakia, comparison, 53
Forestry management policy, implementation in Spain of, TIS4
From Industry Targeting to Technology Targeting: A Policy Paradigm Shift in the 1980s, 341

Genetically engineered organisms, controversy about the release of, 371
German Engineering Education in Transition: The Function of Nontechnical Studies, 449
Germany
historical and philosophical development of engineering ethics in, 427
historical overview of nontechnical subjects in engineering curriculum in, 441
science and technology in, 359
study of communication about greenhouse effect and energy policy in, 301
Government
forestry management policy implementation in Spain, 383
funding biotechnology in Brazil, 311
missing link of demonstrations in energy technology deployment sponsored by U.S., 185
OECD science and technology policy reviews in Hungary and Czechoslovakia, 155
policy shift from industry to technology targeting in U.S., Japan, and Western Europe, 341
reflections on technology transfer from U.S. federal laboratories, 273
Greenhouse effect, study of communication in Germany about energy policy and, 301
Gulf War's Impact on Ballistic Missile Defense Systems, The, 253

Historical and Philosophical Development of Engineering Ethics in Germany, The, 427
Historical Evolution of U.S. Telecommunications, The, 263
Hungary
economics, technology, and environment in, 137
Digital Equipment Corporation in, 159
OECD science and technology policy reviews in Czechoslovakia and, 155
reconstruction of science and technology in, 25
technology and science developments in response to structural adjustments of economy, 281

Information and Communication Technology in the Context of Policy Networks, 327
Innovation, workable concept for national system of, 207

Japan, government policy shift from industry to technology targeting in, 341

Legacy and Change — Higher Education and Restoration of Academic Work in Romania, 75

Medical Sciences in Czechoslovakia, The, 131
Missile defense systems, ballistic; Gulf War's impact on, 253

NASA, anatomy of flawed Challenger decision, 161
National Systems of Innovation: In Search of a Workable Concept, 207
New Approach to Science and Technology in Poland, The, 65
Nontechnical Subjects in the German Engineering Curriculum: A Historical Overview, 441

OECD countries and Czechoslovakia, comparison of R&D systems financing in, 53
OECD Science and Technology Policy Reviews in Hungary and Czechoslovakia, 155
On Guns and Butter: Reflections on Technology Transfer from Federal Laboratories, 273

Philosophical and historical development of engineering ethics in Germany, 427
Poland
new approach to science and technology in, 65
new methods of financing science in, 71
Political Decision Making in Science and Technology: A Controversy About the Release of Genetically Engineered Organisms, 371
Productivity Growth or Factor Substitution? Identifying Technological Change, 229

Recommendation of the VDI on the Integration of Transdisciplinary Studies into the Engineering Curriculum, 461
Reconstruction of Science and Technology in Hungary, The, 25
Re-Emergence of Eastern European Science and Technology, The, 3
Research and development
comparison of systems financing in OECD countries and Czechoslovakia, 53
challenges and needs of agriculture in Eastern European countries, 111
cooperation initiative between European community and Eastern Europe, 149
reversing the brain drain in Eastern Europe, 101
Research and Education in Czechoslovakia: A Few Remarks, 41
Research and Technology — A German Perspective: The International Dimension of Science and Technology, 359
Reversing the Brain Drain from Eastern European Countries: The "Push" and "Pull" Factors, 101
Role of Technical Expertise in Policy Implementation: Forestry Management in Northern Spain, 383
Romania, higher education and restoration of academic work in, 75

Science, financing methods in Poland for, 71
Science and research, cooperation initiative between European community and Eastern Europe, 149
Science and Technology in the New Bulgaria, 57
Scientific and Technological Responses to Structural Adjustment: Human Resources and Research Issues in Hungary, Turkey, and Yugoslavia, 281
Science, technology, and society studies in China, 243
Some Impressions of Science, Technology, and Society Studies in China, 243
STS as an Academic and Social Movement, 399

Technological change, productivity growth or factor substitution for identifying, 229
Technological Strategic Alliance: Digital Equipment Corporation in Hungary — As a Case in Point, 159

Technology and science
developments in response to structural adjustments of economies in Hungary, Turkey, and Yugoslavia, 281
in Bulgaria, 57
in Germany, 359
new approach in Poland to, 65
policy reviews by OECD in Hungary and Czechoslovakia, 155
political decision-making in, 371
reconstruction in Hungary of, 25
re-emergence in Eastern Europe of, 3
Technology, communication and information; techno-political view on development of, 327
Technology deployment, energy; demonstrations as missing link in government sponsorship of, 185
Technology, economics, and environment in Hungary, 137
Technology innovation, workable concept for national system of, 207
Technology, science, and society studies in China, 243
Technology targeting, government policy shift in U.S., Japan, and Western Europe from industry targeting to, 341
Technology transfer from U.S. federal laboratories, reflections on, 273
Telecommunications, historical evolution in U.S., 263
Telephone, Antonio Meucci's pioneer work in the invention of, 409
Turkey, technology and science developments in response to structural adjustments of economy in, 281

United States
government policy shift from industry to technology targeting in, 341
historical evolution of telecommunications in, 263
missing link of demonstrations in energy technology deployment sponsored by government, 185
reflections on technology transfer from federal laboratories in, 273

VDI recommendation on integration of transdisciplinary studies into the engineering curriculum, 461

War, Gulf; impact on ballistic missile defense systems, 253

Yugoslavia, technology and science developments in response to structural adjustments of economy in, 281

Author Index to Volume 15, 1993

Bargellini, Pier L., 409
Bati, Ferenc, 159
Belon, Bertrand, 207
